

# BrightPath Tech

Fast, affordable marketing technology

|                 |                                                                            |
|-----------------|----------------------------------------------------------------------------|
| Proposal to     | Northwind Retail Group                                                     |
| Request         | RFP-2026-017: Customer Data Platform & Marketing Automation Implementation |
| Supplier        | BrightPath Tech                                                            |
| Submission date | 2026-09-08                                                                 |
| Validity        | 90 days from submission                                                    |

**Our understanding of the requirement.** Northwind Retail Group (fictional) operates 180 stores and an e-commerce site across five countries. It requires a supplier to implement a Customer Data Platform that unifies roughly 12 million customer profiles from POS, e-commerce, loyalty and the call centre, integrates with the existing SAP ERP and Salesforce Service Cloud, and activates personalised journeys across email, SMS and app push, with GDPR-compliant consent management.

## 1. Executive Summary

BrightPath Tech is excited to submit our proposal for Northwind's CDP and marketing automation programme. We are a young, agile team and we believe we can deliver the fastest and most affordable implementation in the market.

We will get Northwind live in just 12 weeks at a total cost that is significantly lower than traditional system integrators, so that the marketing team can start running personalised campaigns before the holiday season.

## 2. Proposed Solution

We will implement a SaaS CDP (a leading off-the-shelf product) configured with its standard data model. Customer data from e-commerce and loyalty will be imported through nightly CSV batch files. POS data can be added in a later phase.

Integration with SAP and Salesforce will use the CDP's standard connectors where available; custom integration work, if required, is not included in this proposal. The platform is scalable and cloud based.

Email and SMS journeys will be built using the product's drag-and-drop journey builder. App push is supported through a third-party plug-in.

## 3. Implementation Plan and Timeline

Our accelerated methodology delivers in 12 weeks:

| Phase                  | Weeks | Milestone             |
|------------------------|-------|-----------------------|
| Setup & configuration  | 1-4   | CDP tenant configured |
| Data import & journeys | 5-9   | First campaigns built |
| Testing & go-live      | 10-12 | Go-live               |

Team: a project lead and three consultants. Additional resources can be added if needed. A risk plan will be prepared after kick-off.

## 4. Pricing

Our pricing is simple and transparent. All prices exclude VAT.

| Item                             | Price (EUR) |
|----------------------------------|-------------|
| Implementation (12 weeks)        | 210,000     |
| CDP subscription, per year       | 115,000     |
| Support, per year                | 18,000      |
| Total cost of ownership, 3 years | 609,000     |

Assumptions: implementation is time-and-materials capped at the amount above; subscription pricing is based on 5 million profiles, and additional profiles are charged at the vendor's list price; POS integration and custom SAP/Salesforce integration are out of scope.

## 5. Security and Compliance

BrightPath follows industry best practices for information security. The CDP vendor is responsible for platform security and hosting. We are currently working towards ISO 27001 certification.

We take GDPR seriously and our consultants complete data-protection awareness training. Data residency and data-processing terms will be confirmed with the software vendor during contracting.

## 6. Support and Experience

After go-live we provide email-based support during business hours (09:00-17:00 IST), with a target response within one business day.

BrightPath Tech was founded in 2024. Our team has delivered two marketing automation projects for mid-sized online retailers. References are available upon request.
