

NexaWorks

Delivery excellence for customer data programmes

Proposal to	Northwind Retail Group
Request	RFP-2026-017: Customer Data Platform & Marketing Automation Implementation
Supplier	NexaWorks
Submission date	2026-09-09
Validity	90 days from submission

Our understanding of the requirement. Northwind Retail Group (fictional) operates 180 stores and an e-commerce site across five countries. It requires a supplier to implement a Customer Data Platform that unifies roughly 12 million customer profiles from POS, e-commerce, loyalty and the call centre, integrates with the existing SAP ERP and Salesforce Service Cloud, and activates personalised journeys across email, SMS and app push, with GDPR-compliant consent management.

1. Executive Summary and Understanding

NexaWorks understands that Northwind Retail Group needs to unify about 12 million customer profiles from POS, e-commerce, loyalty and the call centre; integrate with SAP ERP and Salesforce Service Cloud; and activate consented, personalised journeys across email, SMS and app push in five countries.

Our proposal is balanced: a proven composable CDP, a delivery plan built from 14 comparable programmes, a fair fixed price and an operations model designed around Northwind's trading calendar. Our differentiator is predictable delivery and long-term support.

2. Proposed Solution

We propose a composable CDP on Google Cloud (EU region) with a BigQuery-based unified profile store, near-real-time streaming ingestion for web and app events, and 15-minute micro-batch ingestion for POS and loyalty. Identity resolution uses deterministic rules (loyalty ID, email, phone) with a configurable fuzzy-match layer.

Integrations: standard connectors for Salesforce Service Cloud and an SAP integration built on SAP Integration Suite. The platform supports 25 million profiles on the proposed tier and scales by upgrading the tier.

3. Implementation Plan, Milestones and Team

Delivery runs for 22 weeks in five stage-gated phases. Each phase ends with a documented acceptance criterion signed off by Northwind's product owner.

Phase	Weeks	Milestone / acceptance criterion
0. Mobilisation	1-2	Governance, RACI and risk register approved
1. Discovery & design	3-6	Data model and integration specs signed
2. Build (3 sprints)	7-14	SAP, Salesforce, POS feeds in test; 95% match rate
3. Journeys & UAT	15-19	20 journeys pass UAT; performance test passed
4. Go-live & hypercare	20-22	Staged country roll-out; 90-day hypercare

Team (named in Appendix A): engagement director, delivery manager, solution architect, 4 data engineers, 2 marketing-automation specialists, QA lead, change and training lead - 11 FTE at peak, 70%

of whom have worked together on at least three prior programmes. Governance: weekly delivery stand-up, fortnightly steering committee, monthly executive review.

Risk plan: a live risk register with owners and mitigations. Top risks: (1) SAP data quality - mitigated by a data-profiling sprint in weeks 3-4; (2) identity match rate below target - mitigated by tuning cycles with a 95% acceptance gate; (3) peak-season freeze - go-live scheduled before the November change freeze with a rollback plan rehearsed in UAT; (4) key-person dependency - named deputies for every lead role.

4. Commercial Proposal

Fixed-price implementation with milestone-based payments (20/30/30/20). Prices exclude VAT.

Item	Price (EUR)
Implementation (fixed price, 22 weeks)	520,000
Platform licence & Google Cloud hosting, per year	118,000
Managed support (24x7), per year	36,000
Total cost of ownership, 3 years	982,000

Assumptions: pricing covers up to 25 million profiles and 20 journeys; Northwind provides a product owner at 50% allocation; travel is included; change requests at EUR 950 per day; year-2 and year-3 prices are capped at CPI + 2%.

5. Security, Compliance and Risk Controls

NexaWorks is ISO/IEC 27001:2022 certified and has completed a SOC 2 Type I assessment; the SOC 2 Type II audit is scheduled for Q1 2027. Data is hosted in Google Cloud europe-west3 (Frankfurt).

Controls: encryption at rest and in transit, SSO with MFA, least-privilege roles, consent and preference centre with per-channel opt-in, automated GDPR access/erasure workflows, and audit logging of all profile access. We will sign Northwind's DPA and support a DPIA.

6. Support Model, Experience and References

Support: 24x7 follow-the-sun service desk (Pune, Lisbon, Toronto) with a dedicated Technical Account Manager. SLAs: P1 response 15 minutes and restore target 4 hours; P2 response 1 hour; P3 response 8 hours. Service credits apply when SLAs are missed. Monthly service reviews and quarterly roadmap sessions are included, together with a 90-day hypercare period after go-live.

Experience: 14 CDP or marketing-automation programmes since 2019, including six for multi-country retailers. References (fictional): Director of CRM, Harbor & Pine Outfitters; VP Digital, Kestrel Supermarkets; Head of Loyalty, Solstice Beauty.

All organisations, people, clients and figures in this document are fictional and were created for an academic exercise.
