

# Orbit Digital

Retail customer engagement since 2010

|                 |                                                                            |
|-----------------|----------------------------------------------------------------------------|
| Proposal to     | Northwind Retail Group                                                     |
| Request         | RFP-2026-017: Customer Data Platform & Marketing Automation Implementation |
| Supplier        | Orbit Digital                                                              |
| Submission date | 2026-09-11                                                                 |
| Validity        | 90 days from submission                                                    |

**Our understanding of the requirement.** Northwind Retail Group (fictional) operates 180 stores and an e-commerce site across five countries. It requires a supplier to implement a Customer Data Platform that unifies roughly 12 million customer profiles from POS, e-commerce, loyalty and the call centre, integrates with the existing SAP ERP and Salesforce Service Cloud, and activates personalised journeys across email, SMS and app push, with GDPR-compliant consent management.

## 1. Executive Summary

Orbit Digital has specialised in retail customer engagement for more than 15 years. We have delivered over 60 CRM, loyalty and customer data programmes for retailers across Europe and Asia, and we understand the pressures of running a multi-country store and e-commerce estate.

We propose to transform Northwind's customer engagement with a modern CDP and marketing automation capability, drawing on playbooks refined across our retail client base.

## 2. Proposed Solution

Orbit Digital will deploy a leading enterprise CDP and marketing automation suite, hosted in the EU. The platform provides a unified customer profile, segmentation, AI-based recommendations and omnichannel journey orchestration.

Integration approach: the detailed integration architecture for SAP, Salesforce and the POS estate will be defined during the discovery phase once we have reviewed Northwind's systems. We anticipate using a combination of APIs and file transfers as appropriate. Scalability will be assessed during discovery.

## 3. Implementation Approach and Timeline

We use our proven Orbit Launch methodology across 26 weeks:

| Phase          | Weeks | Milestone           |
|----------------|-------|---------------------|
| Discovery      | 1-6   | Discovery report    |
| Design & build | 7-18  | Platform configured |
| Test & launch  | 19-26 | Launch              |

Team: an engagement partner, a programme manager, a CRM strategist and a delivery team sized after discovery (typically 8-10 people). Risks will be managed through our standard RAID log.

## 4. Commercial Proposal

Prices exclude VAT.

| Item                                        | Price (EUR)           |
|---------------------------------------------|-----------------------|
| Discovery (fixed price)                     | 95,000                |
| Design, build & launch (estimate)           | 420,000 - 520,000     |
| Platform licences, per year                 | 125,000               |
| Managed service, per year                   | 40,000                |
| Indicative total cost of ownership, 3 years | 1,010,000 - 1,110,000 |

Assumptions: the build estimate will be confirmed after discovery; licence pricing depends on final profile volumes; integration effort is not yet included in the estimate and will be quoted separately after discovery.

## 5. Security and Compliance

Orbit Digital is ISO/IEC 27001 certified. The proposed platform is hosted in EU data centres and the software vendor holds SOC 2 Type II. We will sign a GDPR Data Processing Agreement and apply role-based access controls. Detailed security controls for integrations will be documented during design.

## 6. Support Model, Experience and References

Managed service: 24x5 support desk with 24x7 cover for P1 incidents; P1 response 30 minutes, P2 response 4 hours. A named customer success manager runs quarterly business reviews.

Experience: 60+ retail engagements since 2010, including CDP implementations for eleven multi-country retailers in the past five years. Retail NPS from our clients averages 61.

References (fictional, contactable): CMO, Aurora Department Stores (CDP for 18M profiles, 7 countries); Head of CRM, Velo Sports Retail (loyalty & CDP, 9 countries); CDO, Maple & Co Grocers (omnichannel journeys, 4 countries); Digital Director, Nordlys Fashion (CDP migration, 5 countries).

All organisations, people, clients and figures in this document are fictional and were created for an academic exercise.
